# Industrial Arts Index

Vol. VII

December, 1919

No. 10

Published monthly, except July and November by

THE H. W. WILSON COMPANY

New York City

Full information in regard to subscription price will be supplied on request.

Put out of sight or discard altogether your 1918 annual volume of the Industrial Arts Index. This is not a command but a friendly warning. Since this volume is a cumulation covering the years 1918 and 1919 and therefore includes everything that the 1918 cumulation contains, the use of the 1918 annual would be a waste of time; all the benefit which justifies the added labor and cost of putting together in one alphabet the two years' record would be lost.

After proving mathematically that during a ten year period there is greater efficiency in the two-yearly or three-yearly than in five-yearly cumulations, the publishers of the Industrial Arts Index sought an expression of opinion from their subscribers, with the result that the two-year plan was adopted. Hereafter, if this plan proves satisfactory, an annual cumulation, covering one year, will be published in the even years and a two-year cumulation will be published in the odd years.

On the following pages will be found a list of periodicals indexed. A few of these are indexed only from January 1919. These are: Architectural Forum, Aviation, Color Trade Journal, Electric Journal, Flying, Journal of Electricity, Marine Review. Owing to the delay in publishing caused by the printers' strike last fall, the December numbers of the New York periodicals did not appear in time for indexing in this volume but will be included of course in the next current issue.

In response to the wishes of our subscribers, ascertained by a carefully tabulated vote, the following additional magazines have been selected for indexing in 1920:

American Ceramic Society. Journal  
American Electrochemical Society. Proceedings  
American Journal of Science  
American Society for Testing Materials. Proceedings  
American Society of Refrigerating Engineers. Journal  
Blast Furnace and Steel Plant  
Canadian Engineer  
Chimie et Industrie  
Commercial and Financial Chronicle  
Electrician  
Engineering  
India Rubber World  
Institution of Mechanical Engineers. Journal  
Journal of Physical Chemistry  
Mining and Scientific Press  
Monthly Labor Review  
National Petroleum News  
Nation's Business  
Paper  
Popular Mechanics  
Power Plant Engineering  
Printers' Ink  
Society for the Promotion of Engineering Education. Proceedings  
Society of Automotive Engineers. Journal  
Society of Chemical Industry. Journal  
U.S. Bureau of Labor Statistics. Bulletin  
U.S. Geological Survey. Bulletin  
Wireless Age

The method of selecting periodicals by vote insures the indexing of those that are actually in use in libraries. It is also the policy of the Industrial Arts Index to index each magazine very closely. In the case of the more important periodicals found in the majority of libraries subscribing to the Index, even short paragraphs are often indexed, and articles of value are usually assigned several subject headings in order that every aspect of the subject may be covered. The headings moreover are made very specific and many

## NOTES AND ANNOUNCEMENTS

sub-headings are made in order that the user of the Index may not have to read thru a long list of references to find material on the particular phase of a subject in which he is interested.

It may be permissible to refer those interested in farm buildings, agricultural machinery, rural sanitation, and other branches of agricultural engineering to the Agricultural Index for additional material on these subjects. Material on commercial subjects which will be more largely represented hereafter in the Industrial Arts Index may also be found in the Readers' Guide to Periodical Literature. But the addition of Printers' Ink, Commercial

and Financial Chronicle and Nation's Business to the list of magazines indexed in the Industrial Arts Index will make it one of the most useful tools of the business library.

Miss Charlotte Noyes deserves credit for a good part of the indexing of the 1918 periodicals. Miss Jessica Doty, formerly of the Engineering Societies Library, has recently assisted in the indexing. Miss Emily Anderson and Miss May Carpenter have prepared copy for the printer and assisted in proof-reading. Miss Elsie Schonholtz has typewritten a large part of the copy. Miss Louise Teich in addition to editorial work has supervised the Index from its beginning in 1913.
